- \* [ ] Comment. Paragraphs 1 and 6 cover the loading operations of the unidentified artillery division which is known to have been transferred from Potsdam to Altenraben since 21 April 1952. The trains have been confirmed by previous reports of the same and other sources. One of the trains on 24 April is mentioned for the first time and increases the total number of these trains to 11.

- \*\* [ ] Comment. On 24 and 25 April, the source of paragraphs 2, 4, and 6 and other sources each reported previously one train as being loaded with units probably of the 66th (?) Sig Regt of the GDFC. [ ] The present report partly confirms this information and mentions another loading operation on 26 April, probably of the same unit. This unit is reported for the first time as being quartered in the WCO school.
